SUMMARY

Full-stack Java engineer who has taken two applications from system design to production — a deployed food ordering platform and a role-based attendance system, both built on Spring Boot microservices and shipped independently. Core stack: Spring Boot, React.js, JWT-secured backends, and Hibernate-optimized data layers. Currently deepening expertise in cloud deployment and distributed systems design.

EDUCATION

Bachelor of Technology - Computer Science and Technology

Aug 2021 – Mar 2025

Department of Technology, Shivaji University Kolhapur

CGPA: 6.85/10

TRAINING AND INTERNSHIP

Java Full Stack Development Trainee

Jun 2025 – Nov 2025

Java By Kiran, Pune

- Built 12+ REST APIs in Java 17 and Spring Boot, pairing each service with React.js and Tailwind CSS interfaces — contributing complete features across the full stack within Agile sprint cycles.
- Participated in code reviews and maintained version-controlled feature branches using Git, following team conventions for PR submissions and merge practices.
- Optimized backend performance by implementing Hibernate caching and MySQL indexing strategies, cutting average API response time by 15% across core service endpoints.

PROJECTS

Feasto – E-Commerce Food Platform

[Link](#)

Java 17, Spring Boot, React.js, Tailwind CSS, Hibernate, MySQL, REST APIs, Microservices.

- Architected a full-stack food ordering platform across 9 independently deployable microservices with 7 REST controllers and consumed by a React.js frontend.
- Implemented JWT-based authentication across 3 user roles (Customer, Restaurant Partner and Delivery Partner), securing role-specific access to a real-time order management dashboard and live cart state.

SAMS Track - Student Attendance Management System

[Link](#)

Java 17, Spring Boot, React.js, Spring Security, MySQL, REST APIs

- Engineered RBAC using Spring Security and JWT, enforcing access control across 3 user roles (Admin, Faculty, Student) and automating database entry generation — eliminating manual role assignment entirely.
- Reduced manual attendance entry errors by 40% through automated validation scripts, processing records for 500+ students across 6 active courses.

TECHNICAL SKILLS

Languages & Frameworks: Java 17, Spring Boot, Spring Security, Hibernate, JDBC, Maven, React.js, JavaScript (ES6+), Tailwind CSS.

API & Architecture: RESTful API Design, Microservices Architecture, JWT Authentication, RBAC.

Data, DevOps & Tooling: MySQL, Git, Postman, Docker.

Foundations: Object-Oriented Design (OOP), Data Structures & Algorithms, Agile Methodologies.

CERTIFICATIONS & AI/ML EXPOSURE

- YUVA AI For All - TCS iON offered by IndiaAI (Exposure to Large Language Models and AI/ML concepts).
- Online Java Certification Course - IntelliPaat Academy
